EXPERIENCE

Software Developer

May 2024 – January 2026

Rutgers University SAS IT Dept.

New Brunswick, NJ

- Built and deployed production instructional platforms, using Node.js, React, Next.js, TypeScript, Python, PostgreSQL, Prisma ORM, Docker.
- Configured AWS EC2 deployments with Traefik reverse proxy and SSL/TLS encryption for secure production hosting.
- Designed CI/CD pipelines with automated testing and cloud deployments, improving release reliability and reducing manual deployment effort.
- Developed a RAG-powered chatbot using Hugging Face, Llama 3.1, and Replicate, capable of processing multi-modal input and generating context-aware responses.
- Developed 100+ Problem Template Engines in Java and SQL to dynamically generate MCQs, text-based questions, and essay-style exam questions.
- Resolved an average of 15 bugs per month, increasing platform stability by 20%.

Data Analyst

Jan 2022 – Oct 2022

LeapForWord

Mumbai, India

- Developed interactive Power BI dashboards that increased analytics usage by 65%.
- Automated daily reporting processes, saving 3 hours per day of analyst time.
- Designed ETL workflows using Power Query, DAX, Excel, and SQL to transform multi-source data into production-ready datasets.
- Generated insights that increased call conversions by 20% without increasing operational costs.
- Built cross-functional reporting systems that reduced redundant data requests by 35%.

PROJECTS

Runbook AI — Python, FastAPI, React, PostgreSQL, LLMs, RAG

Jun 2026

- Built an AI incident resolution assistant that analyzes support tickets, retrieves runbooks, and recommends remediation steps.
- Implemented RAG-based runbook retrieval, confidence scoring, and human escalation for low-confidence incidents.
- Created APIs for ticket intake, AI recommendations, resolution tracking, feedback collection, and dashboard workflows.

LLM Output Arbitration System — Python, FastAPI, OpenAI, SQLite, Docker

Jun 2026

- Built a multi-agent LLM evaluation system using accuracy, logic, and completeness critic agents.
- Implemented disagreement detection, LLM adjudication, final quality scoring, and arbitration history tracking.
- Developed FastAPI endpoints, Streamlit analytics dashboard, SQLite storage, Docker support, and 37 pytest tests.

StackOverfaux Q&A Backend — TypeScript, Express, Prisma, PostgreSQL, Docker

May 2025

- Built a StackOverflow-style REST API for users, questions, answers, comments, and profile management.
- Designed PostgreSQL schema using Prisma with controller-service architecture and validation middleware.
- Containerized the backend and database using Docker Compose with migrations and seed data.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C#, JavaScript, TypeScript, HTML, CSS

Frameworks: React, Next.js, Node.js, Express.js, Django, Flask, Spring Boot, .NET Core, FastAPI

Databases & Cloud: PostgreSQL, MySQL, MongoDB, SQLite, AWS EC2, AWS S3, Azure, GCP, Snowflake

AI/ML: LLMs, RAG, OpenAI API, Hugging Face, Llama 3.1, Replicate, Prompt Engineering

Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch

Tools: Docker, Kubernetes, Git, CI/CD, Prisma ORM, Airflow, Kafka, Hadoop, Spark

BI Tools: Power BI, Tableau, Looker, QlikView

EDUCATION

Rutgers University

Sept 2023 – Dec 2025

Master of Science in Statistics – Data Science

New Brunswick, NJ

Manipal University

Aug 2018 – May 2022

Bachelor of Technology in Computers and Communication Engineering

India
